DETAILED ACTION

Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to a method to reduce the sensitivity of endothelially-compromised vascular smooth muscle comprising administering a CLC3 blocker.
 - II. Claims 4-11, drawn to a method to ameliorate the negative effects associated with vascular smooth muscle endothelium damage comprising administering aCLC3 blocker.
 - III. Claims 12 and 13, drawn to a method to affect CLC3 receptors comprising administering a compound of Formula I.
 - IV. Claims 14 and 15, drawn to a method to reduce contraction of endothelially-compromised vascular smooth muscle in response to agonist, comprising administering a compound of Formula I.
 - V. Claims 16-18, drawn to a method to decrease the effects of vasoconstrictors in pathologic tissues and not in non-pathologic tissues in a patient with pathologic tissues comprising administering CLC3 blocker.
 - VI. Claim 19-21, drawn to a method to stabilize blood pressure in patients with endothelium-compromised vascular smooth muscle, comprising administering a CLC3 blocker.

Art Unit: 1617

- VII. Claims 22-42, drawn to a method to modulate vascular tone comprising administering a chloride channel blocking agent.
- VIII. Claim 43, drawn to a method for treating erectile dysfunction comprising administering a CLC3 channel blocking agent.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I to VIII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated as they have an acquired a separate status in the pharmaceutical art and restriction for examination purposes as indicated is proper. Moreover, the medical disorders to be treated are independent and distinct since they have known different etiology.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
